**Dice Subtraction 11, 12, 20** Materials: Dice, paper for each player, pencil for each player

How to Play: Choose a target to subtract from (11, 12 or 20)

1. Each player writes numbers 6, 5, 4, 3, 2, 1, horizontally across the top of their paper
  2. Players take turns rolling the dice
  3. Cross off the number rolled, subtract it from the target number, and write the answer below it
- Ex: Target number is 12. Player rolls 5, crosses off the number 5, and writes 7 below the 5, because  $12-5=7$ .
4. If a number is already crossed off, lose that turn. First to cross all numbers off wins.
